Technology Makes Customer Behavior Clear**

**Instant Bank Transaction Insights Provide
Measures of Risk, Fraud, and Affordability**

Behavior Made Clear™

Custom attributes created from bank transactions data more insightful than credit data

RevealedAffordability™

Attributes that assess true affordability across all lending products

Patent Pending

Our proprietary processes are a true step forward in the use of bank data in underwriting and account management

5,800

Proprietary attributes available regardless of bank transactions data provider

6

Modules of trended attributes covering KYC/fraud, account & balance trends, inflows & outflows, overdraft and affordability

45%

Lift over traditional credit scores

2.5

second API turnaround

Supercharge Your Consumer and Small Business Strategies

Our attributes, policy flags, and scores provide immense lift for B2C and B2B lenders, underwriters, and brokers for use in conjunction with or to replace traditional credit scores, KYC processes, and income/funds verifications

More Comprehensive than Transaction Categorization

Your customer is more than their spending category. Our attributes isolate transaction velocity against repeat spending and obligations.
